COMPETITOR TRAFFIC (JULY 18, 2018)

This report compares your website's traffic with that of competitors.

Alexa Global Traffic Rank History for marcodiversi.com and competing sites for the last 12 months

Alexa's traffic rank is a measure of how popular a website is relative to all other sites on the web.

The rank is calculated from the site's estimated average of daily unique visitors and its estimated number of page views over the last 12 months. The less the rank is, the more popular the site is.

7. /blog/category/cryptocurrency/
8. /blog/partners/
9. /blog/category/best-resources/

Rewrite duplicate Description tags for 2 pages

Use unique and descriptive Description tags across all pages of your site, because SEs use them as snippets on the search results pages. As an option, you may leave the duplicate Description tags intact but use a "canonical" attribute on the non-canonical pages to let the search engines know which one is the preferred page.

Add ALT attributes to 74 images

Image ALT attributes enrich website usability and return images in relevant search results due to enhanced site SEO. Image ALT attributes help search engines and visually handicapped people to determine what an image is about and how that might fit into the subject of a web page. This attribute provides alternative information for an image also in cases where there is a slow connection, an error in the SRC attribute of the page.

Remove Meta Noindex from 33 pages

The Noindex tag tells search engines not to crawl your page and, therefore, not to include it in their index. Sometimes developers deliberately put Noindex on site pages to avoid indexing pages that are currently under construction or which are being redone. They also may want search bots to ignore very large databases or the printer versions of pages. If that is not or no longer the case and you do want those pages to be indexed, remove Noindex from the following pages so your site is properly crawled and indexed by search bots.
